

No Doubt About This Famous Cereal

**High value at low cost
Ideal for Winter with hot milk.
Proved by 34 years of growing popularity**
Made by The Canadian Shredded Wheat Company, Ltd.

The Noxious Weeds Menace

This is an age of conventions. They are a natural growth and outcome of the more complex and highly organized development of modern life. They are, too, a recognition of the fact that the principles and methods of co-operation are, in many ways and to a large extent, replacing the old individualistic ideas and efforts of the past. This is not to say that the value of individual responsibility and initiative has been, or is to be, discarded rather, that in this age of rapid transportation and communication the old isolation has disappeared and peoples and nations are brought close together. They must, therefore, act as units rather than as distinct and separate entities.

By way of introduction to a reference to a recent gathering held in Saskatchewan at the call of the Provincial Minister of Agriculture, namely, the first Saskatchewan Weed Conference. It was not a large and spectacular convention in many present-day conventions are, but in the importance of the problem it met to consider, it took second place to none. And while it was a Saskatchewan conference, its deliberations and findings were of equal value to the other prairie provinces.

The conference was summoned in recognition of the fact that weeds are making tremendous headway in Western Canada, and that some action must be taken, over and above the preventive policies of the past, if the inroads of weeds and the consequent enormous loss to the farmers and the country as a whole is to be checked.

The conference was attended not only by officials of the Saskatchewan Government, municipalities and farmers' organizations, but by Dominion Government officials, representatives of the railways, mortgage and loan companies, manufacturers, business men, merchants—in a word, every organization having a vital interest in the productive capacity and prosperity of Western Canada.

It was frankly and unanimously agreed that the whole country must be aroused and organized in a campaign for the destruction and elimination of weeds. The only alternative is a rapidly decreasing agricultural production both in quantity and quality, similar returns to the farmer, and decreased business and prosperity for all.

The duty and responsibility of the individual farmer in the matter of keeping his own land free of weeds was in no sense minimized, but it was recognized that, human nature being what it is, some men will neglect their duty, and while they themselves suffer as a result of such neglect, they also inflict loss upon their neighbors who are doing their duty, and upon the community and country as a whole.

The need, therefore, for concerted Government and municipal action was emphasized, and the absolute necessity, in the interest of all, for more drastic control recognized.

It was realized that not only must existing weeds be brought under control and eradicated, but that much more efficient measures must be taken and greater precautions observed to put a stop to the sowing of weed seeds and the propagation of the weed plants.

It is not possible in this article to discuss all the phases of this intricate problem, but at this season of the year, when farmers are beginning to think about and plan their work for the spring, one factor may well be stressed. That is, the importance of sowing good, clean seed and not a mixture of grain, good and bad, and weed seeds.

The astounding discovery was made by the seed drill survey conducted in Saskatchewan that 70 per cent. of the seed sown in the province was lower than No. 2, due largely to the inefficient operation of farm farming mills. In other words, while farmers and governmental authorities on the one hand are fighting weeds, the farmers in the sowing of their crops are planting thousands of bushels of weed seeds.

The first step towards victory over the weed enemy is to put an immediate and definite stop to the planting of weed seeds in prepared soil. If the propagation of weeds is continually carried on and assisted in this way, it must be recognized that the weed menace will grow, and that final victory will rest with it and not with the farmer.

The spring slogan for all Western farmers in 1929 should be: Look to your seed grain. See to it, above everything else, that it is good, clean seed. If weed seeds are sown, it is inevitable that weeds will be harvested. Remember, it is still economically tight in farming as in all the activities of life that, whatever a man sows that shall he also reap.

Silver Foxes for Italy

A number of silver foxes have been sent from Canada to ranches in the Italian Alps, where ranching conditions are stated to be ideal, and where the fox farming industry is showing a steady growth.

When the plumber died his wife took no chances. She buried his tools with him.

During the World War a person's equilibrium was tested for flying by an elaborate turning chair.

Needs Some Exercise

The idle farm horse is better to rough it a little. Heavy feeding is unnecessary, and standing day after day in a warm stable unites the horse for spring work. A few hours in the yard or field every day keeps the muscles hard.

Use Minard's Liniment for the Flu.

He—I suppose I'm only a pebble on the beach of your life?
She—That is true, but you might stand a chance if you were a little boulder.

To Check "FLU," Gripe

Fights the Germs in the Throat Before They Invade Other Parts of the Body.

EFFECTIVE PREVENTIVE MEASURES EXPLAINED

Simple precautions taken now will enable you to fight dreaded "Flu" which is spreading rapidly through the whole country. The germs of influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerville. Half a teaspoonful of Nerville in water makes a most efficient gargle. The germ-killing properties of Nerville quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure, to rub the nose and chest with Nerville. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding wastes. This combination treatment of Nerville and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Lieutenant-Governor Appointed

J. D. McGregor, Brandon, to Succeed Late Hon. T. A. Burrows
J. D. McGregor, Brandon, has been appointed Lieutenant-governor of the province of Manitoba. Mr. McGregor succeeds the late Hon. T. A. Burrows who died in Winnipeg recently. Announcement of the appointment was made by Premier W. L. Mackenzie King at the conclusion of a meeting of the cabinet.

The Lieutenant-governorship was offered Mr. McGregor several days ago, and from his home in Brandon, he announced acceptance of the post, stating that he considered the appointment as a compliment to the agricultural interests of the province rather than to himself personally.

WAS ALWAYS AILING
NEVER FELT WELL

Health Restored Through the Use of Dr. Williams' Pink Pills

"I am one of the many who have found new health through the use of Dr. Williams' Pink Pills," says Mrs. Everett Dowe, South Nelson, N.B. "For some years I never felt well, and at times was so weak that I would be confined to bed. At the very best I was in an ailing condition and found it difficult all the time to do my housework. I was subject to headaches, poor appetite, breathlessness at the least exertion, and very pale. Before Dr. Williams' Pink Pills were recommended to me I had tried several medicines, but without any good results. I had become completely discouraged and felt that I would always be an invalid. A friend strongly urged me to take Dr. Williams' Pink Pills, and finally I consented to do so, but without much hope that they would help, where other medicines had failed. But in this, to my joy, I was mistaken. I had not been taking the pills very long when I knew they were helping me. As I continued their use I found my appetite improving, I slept better at night, and my strength was gradually returning. I continued taking the pills for several months, when I again found myself a well woman, and I believe that had not been for Dr. Williams' Pink Pills I would today be a helpless invalid. The pills have since been taken by others in our family with the same beneficial results. I strongly urge every weak woman to try this grand health-building medicine."

If you will send your name and address to The Dr. Williams' Medicine Co., Brockville, Ont., a little book, "Building Up the Blood," will be sent you free of charge. You can get these pills through any medicine dealer or by mail at \$1.00 a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Advances New Theory

Baltimore Physician Says Lack of Lime Makes People Irritable

More lime in the diet as a preventive for divorce was urged by Dr. George Walker, addressing the National Housewives, Inc., at Baltimore. Absence of lime, he declared, makes a woman nervous and a man cruel—hence family troubles result.

When there is every appearance of a home being wrecked Doctor Walker suggested that lime, as found in a pint of milk, be added to the diet of a couple daily for two weeks in all probability would adjust matters, restore amiability and keep the home intact.

He also would add two oranges a day for each and a quarter pound of cold slaw at least three times a week.

It Bids Pain Begone.—When neuralgia racks the nerves or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish and rest.

As a molecule of water passes through the pores of your skin it is like a man passing through a gate seven miles wide.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. It seldom fails.

New Air Service Planned

Air express and passenger services between Winnipeg and United States points will be established within a month on a tri-weekly basis, according to Capt. P. T. McCarty, president and operating manager of the International Airways, Inc., of Seattle. The service will be in co-operation with the Western Canada Airways, Limited.

How many people with an automobile today owned a horse and buggy in the days of not so long ago?

Minard's Liniment for the Gripe and Flu.

W. N. O. 1771

Hydro Power Shows
Record Development

Dominion Now Has Total of 5,328,000 Horse-Power

With world interest centered upon the efforts being put forth in almost every country to secure additional supplies of low-priced power for the needs of industry, the recent official review of hydro-electric progress in Canada is, as it does, that throughout the Dominion the greatest activity prevails in harnessing for industrial, commercial and domestic use the advantageously situated and ample water-power resources of the country.

During the year 1928 the energy of the water-wheels or turbines actually installed and brought into operation amounted to 550,000 horsepower, thus bringing the total for the whole Dominion to 5,328,000 horsepower. In addition to this large increase there are many projects under active construction, some of which will undoubtedly be undertaken in the near future.

For the actual development, transmission, and distribution of the power capacity installed in 1928, together with that now under active construction, it is estimated that not less than \$350,000,000 will be required; while for every dollar expended in power development competent authorities have estimated that six dollars are required in its application. It is necessary, therefore, to visualize the effects throughout the country of the expenditure of an amount reaching, probably, \$2,200,000,000.

New Oriental Silk

Japan and China Have Invented Mixed Fibre Product

To combat American artificial silk manufacture, Japanese and Chinese manufacturers have invented a new silk fabric, utilizing both real silk fibre and those of spruce wood in a combination, the shoen of which is expected to revolutionize the present market according to a Yokohama exporting firm.

Artificial silk has seriously affected the production of cocoon silks in the Orient during the last two years. The new cloth is expected to reach world markets in the early spring.

For Scalds or Burns.—Dr. Thomas' Electric Oil is a standard remedy for the treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinarian's fee.

A Peculiar Timepiece

Clock Made in Switzerland Looks Like Sun

A turtle tells you the time in a unique timepiece produced in Switzerland. At first glance, the clock appears to be a sun-dial with a circular tray, filled with water, set in the face. In this tray a small imitation turtle floats, carrying a piece of steel in its back. As the hour hand advances under the tray it attracts the turtle by means of magnet. If removed from the water and later replaced, the little turtle immediately swims across to the point on the tray directly above the hand, thus indicating the time. The eight-day clock mechanism is wound in the usual way, and regulated after the tray and the face of the timepiece are removed.

Weapon Appears Harmless

Pistol Found in New York Looks Like Fountain Pen

A "fountain pen" that spurs 38-calibre bullets was picked up near a street corner in New York City recently and turned over to the police. The tiny weapon, little longer than the width of a man's hand, is shaped to appear exactly a harmless writing instrument. A few feet away, it would be mistaken for a real pen. Only when it is examined closely does the open muzzle at one end reveal its dangerous character. The pistol unscrews in the middle to insert the cartridge. It is fired by pressing a small button, about the size of a pinhead, in the end of the weapon. This releases a spring that operates the firing pin.

The Adirondacks contain more than 100 scenic lakes.

Cuticura Soothes
Burning Aching Feet

Bathe the feet for several minutes with Cuticura Soap and warm water, then follow with a light application of Cuticura Ointment, gently rubbed in. For tired, hot, irritated feet this treatment is most comforting. Cuticura Talcum is cooling and refreshing.

Three Hundred Years
To Prepare Grammar

Immortals of French Academy Still Working on Book

"The world of letters moves slowly. Witness the speed in action of the 'immortals' of the French academy; 293 years ago the body, the personnel of which remains numerically fixed at 40, although its component individuals change with deaths and new elections, announced that it was going to publish a grammar of the French language.

Now the permanent secretary of the academy promises that the book will actually go to the printer soon—probably in 1930.

At the time of its foundation in 1635, the French academy was pledged to undertake publication of three works. Ten years later it was announced that one of these, the long awaited grammar, was "being prepared."

The "immortals," to whom two or three centuries are of slight import, have been preparing it, ever since.

Protect Your Children
From "Flu," Gripe

A WARNING TO PARENTS!

Flu germs are everywhere today. They reach the system through the nose and throat. Mothers can protect their children in a very simple way.

Take a saucupen of water, place it on a lamp or stove. Add a half-teaspoonful of Catarrhazone to a pint of water, which is brought to a boil. Let the steam from the kettle fill the room so that the medicated air is breathed by the child. This germ-killing vapor disinfects the child's breathing organs and kills the "flu" germs.

Catarrhazone Vapor stops cold, prevents Gripe, relieves Sore Throat, prevents Flu, sore and efficient. Just as good for adults as for children. If you keep the air in your home disinfected with Catarrhazone Vapor you are well protected from dangerous Flu, Influenza, Gripe, and Colds. All druggists sell Catarrhazone in 50c bottles.

More Purchasing Power

The purchasing power of the people of Canada increased by half a billion dollars during 1928, when revenue from productive industries reached the record total of \$6,840,273,095, an increase over 1927 of almost \$500,000,000.

Shipping Sets New Mark

New Westminster Exceeds 1927 Record by Forty-five Ships

A new mark in shipping was set at New Westminster during 1928, exceeding by 45 ships the 1927 record of 153. The figure does not include the coastwise shipping, which is handled through the Department of National Revenue. The net tonnage of the ships handled through the harbor commissioners' office was 655,271 tons and the gross 884,368 tons, compared with 483,603 and 776,226, respectively, in 1927.

Exhausted from Asthma.—Many who read these words know the terrible drain upon health and strength, which comes in the train of asthmatic troubles. Many do not realize, however, that there is one true remedy which will usually stop this drain. Dr. J. D. Kellogg's Asthma Remedy is a wonderful check to this enervating ailment. It has a countless record of relief to its credit. It is sold almost everywhere.

Built To Auto Design

First British Plane of This Type Put on Market

Britain's first airplane to be built to automobile design has been placed on the market under the name of Simmonds Spartan light plane.

The craft has four wings, which are interchangeable in the same way that the four wheels of an automobile are interchangeable. There also is a spare wing which is carried for emergencies.

The new machine is fitted with a four-cylinder, air-cooled engine of 30-horsepower. It recently was tested on a non-stop flight from London to Berlin, 620 miles, in six hours.

Statue for Mrs. Fankhurst

Premier Stanley Baldwin has consented to unveil a seven-foot bronze statue of the one-time suffragette, Mrs. Emmeline Fankhurst, to be erected in Westminster this summer from publicly subscribed funds.

New Brunswick's contribution to Uncle Sam's Yuletide celebration included some 3,000,000 Christmas trees—the greatest number ever shipped from the province.

Minard's Liniment prevents Flu.

Poisonness is one of the best investments known. It pays enormous dividends.

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it's not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin;
it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) of the Bayer Manufacturing. While it is well known that Aspirin does not harm the heart, it is well known that Aspirin does not harm the heart.

ADVANCE IN HAIL INSURANCE RATES FOR WEST

Montreal.—Substantial increases in hail insurance rates in Alberta and parts of Saskatchewan were decided upon at the annual meeting here of the Canadian Hail Underwriters' Association. Details of the increases remain to be worked out at a further meeting, but it was understood that for most of the province of Alberta the increase in rates will be confined largely to the extreme south, although not to all parts of that district. The increase there would be five per cent.

Reductions will be put in force in many parts of central and northern Saskatchewan, Manitoba is not affected.

This information was given to the Canadian Press by John Wilcox, president of the organization for the coming year. Mr. Wilcox stated the association was not hearing its new costs upon the excessive damage through hail during the past two years but was taking an average for the last 15 or 16 years' operations.

Forty-two delegates representing hail insurance companies in Canada, with some members from Chicago and New York, attended the meeting. The decision to raise rates followed study of a report of a committee of experts who found that over a period of 15 years losses have been so heavy that hail underwriting has been far from profitable.

Accorded Privileges Of Press Gallery

Each Dominion Now Has Press Representative in British House

London.—As a means of facilitating the despatch of British parliamentary news to Canada and the other dominions, the principal dominion press representatives in London have now been accorded the privileges of the press gallery at Westminster, similar to those accorded writers for the London papers.

Previously there was only one press gallery ticket for all the dominions together. Each principal dominion representative now receives an individual ticket. It is understood that Hon. L. C. M. Amery, secretary for the dominions, personally had a hand in securing this improvement.

Abandons Visit to Europe

Bombay, India.—Mahatma Gandhi, Nationalist leader, who hopes to achieve home rule for India within a year, has abandoned his idea for a visit to Europe this year. Writing in the current issue of the newspaper "Young India," he says: "I dare not think of next year. A Danish friend writes to tell me I could usefully go to Europe only as a representative of a free India. I felt the truth of this remark."

Has Remarkable Record

Winnipeg.—John McDougall, veteran sergeant-at-arms of the Manitoba legislature, is in indifferent health at present, and for a second time in half a century may not be well enough to attend the opening of the house on February 11. Last year he was ill too, and it was the first time in 50 years that he was unable to carry the mace on an opening occasion.

World's Largest Theatre Sold

New York.—The Hippodrome, the world's largest theatre, has been sold for approximately \$5,000,000. Although the purchaser, Frederick Brown, a real estate operator, would not disclose his plans, it was indicated that he had a new project in mind for the site, and that the theatre might be razed.

Villagers Arrest Fishman

Potosi, Mich.—The entire male population of Cross village, breaking a path through towering snow drifts reached a hospital here bearing Lewis Sweet, 54-year-old fisherman, who reached mainland after a week's battle with jagged ice floes in Lake Michigan.

Will Not Interfere

London.—Sir Austen Chamberlain, British foreign secretary, told the House of Commons that the British government has no intention of assisting any of the factions contending for power in Afghanistan. He added that it would not interfere in the internal affairs of that country.

W. N. U. 177A

Aid For Civil Aviation

Flying Clubs Will Be Given Thirty-two New Planes This Year

Ottawa.—Thirty-two aeroplanes will this year be given flying clubs by the government. It is estimated by flying officials in the national defence department.

Besides leasing two machines to each newly-formed organization, one extra machine is given for each one which the club members purchase themselves. The 16 clubs already in operation are each expected to buy a machine this year.

There are over 150 flying pilots in Canada with seven years' experience in the air, according to figures compiled by the national defence department in connection with applications now being received by the civil service commission for two positions as inspectors of civil aviation.

There is one vacancy at Ottawa and one at Regina. These additions to the staff occasioned by the development of aviation. At present there are three inspectors. Their duties include the examination of prospective pilots, testing of machines for airworthiness and choice of locations for airfields.

Doukhobors Found Guilty

Ringleaders in Clash With Police Receive Jail Sentence

Grand Forks, B.C.—Eight sons of freedom, Doukhobor religious fanatics, were sentenced to serve six months each for obstructing police officers. They were found guilty by John A. Hutton and John M. Donaldson, justices of the peace. The fanatics offered no defence.

The fanatics were arrested and charged following a clash with 14 provincial police officers and 10 police officers who sought to arrest Streplakoff and Wolken, wanted for infringement of the School Act. The Sons of Freedom announced to prevent the arrest of their leaders, but were overcome by tear gas bombs.

Peter Vereglin, Doukhobor community head, reported to have testified in these actions, was engaged in a marketing act trial. He did not figure in the case.

Coast Wants Orient Trade

Would Gain Larger Share of Canadian Trade, Says T. S. Dixon

Ottawa.—Canadian boards of trade from the Atlantic to the Pacific are interlocked in such a way as to secure immense benefits for national commerce and fruitful results from their co-operative labor, said T. S. Dixon, president of the Vancouver Board of Trade in an address at the 72nd annual meeting of the Board of Trade.

Within the next two years, Mr. Dixon declared, Vancouver would lead an expedition of Canadian business men into the Orient in an attempt to further increase the prestige of the Dominion in the Far East and gain a larger share of Oriental trade for the manufacturers and producers of Canada.

Submits Request To League

China Wants to Protect Her People Against Opium Evil

Geneva.—The opium evil was made the occasion for another plea by China for the right to police its own territory irrespective of the nationality of offenders.

Wang Kiang-Ky, chief representative of his country at Geneva, submitted that it was impossible to separate the narcotic and political questions so long as China was not free to protect her own people against the acts of nationals of other powers.

Plans Branch Line in B.C.

Nelson, B.C.—Notification to the public of its intention to apply at the coming session of parliament for charter rights to build a railroad link from Kootenay Landing to Creston, B.C., is announced by the Canadian Pacific Railway in a statutory notice. The notice issued from Montreal under date of January 29, is signed by E. Alexander, secretary.

Carpenter Electrocuted

Winnipeg.—William Jardine, 26, a carpenter, was electrocuted at the substitution of the Winnipeg Electric Company near Selkirk, Man., when his saw came in contact with a high tension wire.

Would Try New Stunt

Detroit, Mich.—Gene Lausser, who dropped over Niagara Falls in a rubber ball July 4 says he will jump off a new 46-story building here for \$25,000, with a pair of wings of his own design.

Plan Being Endorsed

National Day of Thanksgiving for Recovery of King Is Urged

Vancouver.—A movement emanating in the province of Quebec to hold a national day of thanksgiving throughout Canada for the recovery of His Majesty King George from his recent illness, and which it was stated has the endorsement of Premier Taschereau of Quebec and other prominent men of that province, was wholeheartedly supported by Mayor W. H. Malkin and the Vancouver city council.

Winnipeg.—Endorsement of the plan to hold a Dominion-wide day of thanksgiving for the recent recovery to health of His Majesty King George was given by Mayor Dan McLean of Winnipeg.

Senator Walsh of Massachusetts is waging a campaign in congress to show the United States the amount of trade which Canada is winning from the republic. He expressed the opinion that Canada was too keen and is rapidly outstripping the United States.

Studying Aircraft Device

Immortal Government May Establish Direction Finding Apparatus Service

Ottawa.—For the purpose of ascertaining what the United States is doing in the field of direction finding for aircraft by radio, Maj. W. Arthur Steel, one of the senior officers of the signals service, department of national defence, has gone to Washington, New York; and other points, to obtain information for Canada. Direction finding apparatus has been used to advantage in the operation of aircraft in several countries and the Canadian government is considering establishing such a service in the Dominion.

RIVALRY SEEN BETWEEN ITALY AND FRANCE

Toronto.—The Mail and Empire publishes the following special cable from Paris:

"A factor in the world naval situation which hitherto has been obscured by Anglo-American rivalry, is the limitation of naval armaments in the growing rivalry between France and Italy in the Mediterranean, as reflected in their building programs. For the first time much prominence is being given to this subject here and it may fairly be suspected that the British 'big navy' party is preparing to counter any suggestions for a naval holiday with the United States by pointing to the danger to British interests if European waters are necessitating more frigate building."

Hector J. Bywater, well known naval expert in a column article in the Daily Telegraph analyzes in startling terms the French-Italian building race and speaks of the Mediterranean as "one of the main arteries of our empire."

"No neutral can hope to conduct business as usual in a zone of active warfare," he finds proceeding to pile up statistics intended to prove his contention. "That France and Italy are now in open rivalry for strategic control of the Mediterranean is the only possible inference to be drawn from recent developments."

CANADIAN IDEAS IN JAPAN

When K. Hashima, superintendent of rolling stock and car equipment, Sapporo district, Japanese Government Railways, was in Canada recently studying the operations of the Canadian National Railways for the benefit of the people of his own country, was particularly interested in the methods used in clearing snow from the track. In a letter to W. A. Kingsland, general manager of the National system's western region, Mr. Hashima expressed his thanks for the co-operation given him by A. H. Eager, general superintendent, motive power and car equipment, Winnipeg, and McCowan, assistant general superintendent, car equipment. He went on to describe a new type of snow-fighting machine which he had devised from ideas given him by K. D. McLeay, bridge and building master of the Canadian National Railways, Calgary division. The machine, which is the most successful of all the types tried on the Japanese railways, has been named McLeay. The plan is seen here in action and the inset is a photograph of Mr. McLeay.

London Awaits News

Announcement of Duke of Gloucester's Engagement Expected Shortly

London.—The Daily News said it understands that the engagement of the Duke of Gloucester, formerly Prince Henry, third son of King George, would be announced shortly. The newspaper said it was believed the duke was engaged to Lady Angela Scott, daughter of the Duke and Duchess of Buccleuch.

The Daily News understood that the announcement had been delayed because of King George's illness.

Appointed Vice President

Winnipeg.—R. S. Law, formerly of Claresholm, Alta., has been appointed to the board of directors and to the position of first vice president of the United Grain Growers, Ltd. It was announced here by Hon. T. A. Crerar, president of the company. Mr. Law succeeds C. Rice-Jones, who held the position for the past 11 years and who resigned to enter business in his own right.

TRAFFIC VIA CANADA'S PORTS NORMAL FACTOR

Washington.—Discriminatory tariffs against goods imported into the United States via Canadian ports is recommended by only one out of three government departments which reported to the senate on the division of United States commerce to Canadian ports. The other two found that the movement of United States imports and exports through its neighbor's ports was caused chiefly by the normal factors of international trade and transportation and nothing much could be done about it except to discuss with Canada through diplomatic channels the possibility of putting United States ports on an equal basis with Canadian ports on imports into Canada.

The majority report which remarks at the outset that Canadians are just as much concerned over the movement of Canadian export grain through United States ports was made by the departments of state and agriculture and the Interstate Commerce Commission. It was unanimous.

The minority report was made by the United States shipping board which operates at a deficit the shipping, acquired by the United States government during the war. The one of the two reports is sharply contrasted. The majority quotes statistics to show that 27 per cent. of all Canada's exports travel through United States ports while only five per cent. of United States exports travel through Canadian ports.

May Send Minister to States

Washington.—Negotiations for the exchange of diplomatic representations between the United States and the Union of South Africa, were said at State Department, to be under way. South Africa would be the third entity of the British Commonwealth to appoint a minister to Washington. Canada and the Irish Free State are the other two.

Appropriation for Highway

Washington.—The house foreign affairs committee approved a resolution authorizing the appropriation of \$50,000 to permit the United States to co-operate with Latin American nations in the building of a Pan-American highway. The highway would extend from Canada to Cape Horn.

Unemployed in Germany

Berlin.—The official number of unemployed persons in Germany has increased to 2,509,000. Unofficial estimates placed the number at 2,750,000.

SAYS CANADA TOO KEEN

Senator Walsh of Massachusetts is waging a campaign in congress to show the United States the amount of trade which Canada is winning from the republic. He expressed the opinion that Canada was too keen and is rapidly outstripping the United States.

Senator Walsh of Massachusetts is waging a campaign in congress to show the United States the amount of trade which Canada is winning from the republic. He expressed the opinion that Canada was too keen and is rapidly outstripping the United States.

Figures Show Slight Increase

Twelve Per Cent. Advance in Immigration to Canada Last Year

Ottawa.—Immigration to Canada continues to show a moderate increase over that of a year ago, the total for nine months of the fiscal year up to and including December being 141,113 compared with 128,992 for the same period in 1927. The increase is 12 per cent.

The total immigration of December amounted to 5,515 compared with 4,569 in December, 1927, an increase of 21 per cent. The month's immigration included 1,476 British, 1,544 from United States, 24 Belgians, 50 Danish, 99 Dutch, 204 Finnish, 31 French, 454 Germans, 44 Norwegians, 15 Swedish, 15 Swiss and 1,498 of other races.

Of the 141,113 immigrants who came to Canada in the last nine months 82,257 were of the farming class and 14,199 were female domestic servants.

Parley On Import Preference Likely

But Reports Presented by President Coolidge Not Yet Received

Ottawa.—At the department of external affairs, it was stated that the reports presented by President Coolidge to congress on the subject of customs preferences on imports through Canadian ports have not yet been received. No diplomatic representations based on them have yet been made. The United States minister in Ottawa, however, brought through his presence to the attention of Premier Mackenzie King some weeks ago.

London Awaits News

Announcement of Duke of Gloucester's Engagement Expected Shortly

London.—The Daily News said it understands that the engagement of the Duke of Gloucester, formerly Prince Henry, third son of King George, would be announced shortly. The newspaper said it was believed the duke was engaged to Lady Angela Scott, daughter of the Duke and Duchess of Buccleuch.

The Daily News understood that the announcement had been delayed because of King George's illness.

Appointed Vice President

Winnipeg.—R. S. Law, formerly of Claresholm, Alta., has been appointed to the board of directors and to the position of first vice president of the United Grain Growers, Ltd. It was announced here by Hon. T. A. Crerar, president of the company. Mr. Law succeeds C. Rice-Jones, who held the position for the past 11 years and who resigned to enter business in his own right.

TRAFFIC VIA CANADA'S PORTS NORMAL FACTOR

Washington.—Discriminatory tariffs against goods imported into the United States via Canadian ports is recommended by only one out of three government departments which reported to the senate on the division of United States commerce to Canadian ports. The other two found that the movement of United States imports and exports through its neighbor's ports was caused chiefly by the normal factors of international trade and transportation and nothing much could be done about it except to discuss with Canada through diplomatic channels the possibility of putting United States ports on an equal basis with Canadian ports on imports into Canada.

The majority report which remarks at the outset that Canadians are just as much concerned over the movement of Canadian export grain through United States ports was made by the departments of state and agriculture and the Interstate Commerce Commission. It was unanimous.

The minority report was made by the United States shipping board which operates at a deficit the shipping, acquired by the United States government during the war. The one of the two reports is sharply contrasted. The majority quotes statistics to show that 27 per cent. of all Canada's exports travel through United States ports while only five per cent. of United States exports travel through Canadian ports.

May Send Minister to States

Washington.—Negotiations for the exchange of diplomatic representations between the United States and the Union of South Africa, were said at State Department, to be under way. South Africa would be the third entity of the British Commonwealth to appoint a minister to Washington. Canada and the Irish Free State are the other two.

Appropriation for Highway

Washington.—The house foreign affairs committee approved a resolution authorizing the appropriation of \$50,000 to permit the United States to co-operate with Latin American nations in the building of a Pan-American highway. The highway would extend from Canada to Cape Horn.

Unemployed in Germany

Berlin.—The official number of unemployed persons in Germany has increased to 2,509,000. Unofficial estimates placed the number at 2,750,000.

Spectators Thrilled By Parachute Jump

Two Winnipeg Airmen Brave Wind and Below Zero Weather

Winnipeg.—Braving a high north-west wind and 13 below zero weather, Flight Lieut. A. Carter and Sgt. Joe Maskell, of the Royal Canadian Air Force, thrilled 300 persons at Stevenson Aerodrome by jumping from aeroplanes with parachutes at a height of 2,500 feet.

The feat is unique in Manitoba and perhaps in Canada, considering the weather conditions.

Carter landed in a clump of trees two miles east of the point where he jumped, and a group of airmen had to rescue the parachute from the branches. Maskell also was carried far afield.

Carter's jump was the 36th of his career. He holds the record for parachute jumping in the British Empire, having made a leap of 20,000 feet at High River, Alberta, in November, 1925.

Secures Desired Land

Veteran of C.E.F. in Siberia Files on Peace River Homestead

Peace River.—After waiting from Friday, January 18 until Monday morning, January 28, G. Turcotte, father of a family, secured the land of his choice, a homestead in the Falher district that had been under lease but recently was thrown open for filing. Ten days of terrible sub zero weather with the thermometer ranging from 20 below during the day and down to almost 50 during the long nights he endured.

Turcotte did not have it all his own way for Corporal McDonald of the mounted police was on hand to prevent disorder. He ordered Turcotte to remove his hand from the door knob so that the door could be opened. Another man named Turcotte was on hand and secured it while the door was opening, but Turcotte was in the most favorable position and squeezed in first.

Manitoba House To Open February 11

Will Proceed to Take Up Business Without Adjournment

Winnipeg.—The Manitoba legislature will go into session Monday afternoon, February 11, at 3 o'clock. An order-in-council fixing this date was signed by Hon. J. D. McGreggor, shortly after being sworn in as lieutenant-governor.

The house will proceed with the business before it immediately after the formal opening ceremony and the reading of the speech from the throne by the new lieutenant-governor. This will be a departure from custom previously followed.

Will Not Compromise

Toronto, Ont.—The ladies' sign jump which was on the program of the Melrose games at New York, February 9, has been cancelled, according to a wire received by Miss Myrtle Cook. The wire said exhibitions were not permitted at these games and that Miss Ethel Catherwood has been notified to this effect. This means that Miss Catherwood will not compete in New York.

Praises Prince for Visit

West Hartlepool, Eng.—The visit of the Prince of Wales to the coal fields was praised by Labor Leader Clynes at a meeting here. "I think there is a fine human touch in that act and nothing has brought the throne nearer to the trouble of the poor than this unprecedented act by perhaps the most popular figure in the world."

May Send Minister to States

Washington.—Negotiations for the exchange of diplomatic representations between the United States and the Union of South Africa, were said at State Department, to be under way. South Africa would be the third entity of the British Commonwealth to appoint a minister to Washington. Canada and the Irish Free State are the other two.

NOTES AND COMMENTS

The Synod of the Diocese of Calgary is meeting this week, under the most favorable auspices in its history. It is forty years since it was established, and has experienced the vicissitudes and trials that confront pioneer effort. The late reverend Bishop Pinkham laid the foundations, with his faithful band of clergy, and was succeeded by the Rt. Rev. Ralph Sherman, whose success in putting the finances of the Diocese on a sound basis through the Anniversary Appeal marked him as a practical executive as well as spiritual guide in inspiring clergy and laity. The church throughout the centuries has been in the vanguard of the progress of civilization, and is the strongest bulwark for our guidance in times of peace or in difficulty and distress.

Considerable importance has been given in news despatches and editorial expressions in southern Alberta dailies on the probable construction of a connecting link to make an all-rail route round Kootenay Lake via the C.P.R. to Vancouver. It has been talked of for many years and with the increasing development of the western provinces with its resultant necessity for more rapid transportation facilities in freight and passenger traffic, there is no doubt it will eventually be built. The Crow line is already carrying a heavy volume of freight traffic, and has the advantage of crossing the summit of the Rockies at Crows Nest 882 feet lower than at Stephen, the highest point on the main line, in addition to which the mileage is considerably less than over the northern line.

The following editorial from the official magazine of the Canadian Chambers of Commerce is worth re-printing and is commended to the attention of Coleman business men: It is said that Arctic explorers know when they are approaching the ice fields before these are seen by a luminous appearance near the horizon which the Greenland men call "The blink of the ice." That 1929 will be a year of continuing prosperity in Canada and of signal economic advancement is clear from the bright pre-dictions made by business leaders in all branches of the Dominion's activities. These predictions are made on the basis of the known and the authentic while there equally enter into the forecast an appreciation of the realizable possibilities of Canadian development. One of the most effective agencies existing for the capitalizing of our Dominion-wide opportunities, is the properly organized and actively functioning Board and Chamber in every community whether it be small or large. Canada is built upon community life, both rural and urban. If the citizens who are business men will gird themselves with the armour of civic interest and endeavour, there will be the double assurance that the "blink of the future" is more than a fanciful conception.

I, Joseph Emmerson, hereby certify that I have examined all the books, vouchers, minutes of meetings, etc., of the Coleman S. D. No. 1216, of the Province of Alberta for the fiscal year ending December 31st, 1928, and that I have found vouchers and authorization for all the items.

I further certify that I have counted the cash and examined the Bank Books or obtained information from the bank regarding the Bank Balances, showing that there is a balance on hand amounting to \$19,543.58, represented by—(a) Actual cash on hand \$200.60, (b) Actual balance in bank \$19,342.98.

Date of Audit: January 22nd, 1929.

J. EMMERSON,
Official Auditor, Coleman, Alta.

Here and There

(225)
A skin game—Two young boys living 50 miles northwest of Edmonton started a coyote farm in 1927 by digging young coyotes out of the ground and confining them in a pen. They got 140 young animals and when their skins were mature sold them for \$12 each.

A southern packing plant specializes upon horse meat for shipment to parts of Continental Europe where it is very popular. It has been suggested that the nondescript range horses straying about Southern Alberta be herded for packing purposes. It is a pity someone could not figure out a similar way of consuming some of the old motor cars that are loose on the highways.

Twenty oil burners measuring overall 57 feet in length and weighing 725,000 pounds have been ordered by the Canadian Pacific Railway and will be in passenger and freight service through the mountains this summer. Each of them will do the work of two or more of the lighter locomotives. They are the largest in the British Empire and will revolutionize transportation in the west, it is predicted.

Victoria is having a mid winter golf tournament open to members of the local clubs and to guests of the Empress Hotel, and the players won't have to play in mittens and fur coats, either. In the east they have a game called winter golf that they play with bow and arrows on skis or snowshoes, but the golf at Victoria is the legitimate article. The game is played the year round in the equable climate of the Pacific coast.

Unique and luxurious cars, differing from anything operated in this country before, will be carried by the two crack trains of the Canadian Pacific Railway, the Trans-Canada Limited between Montreal, Toronto and Vancouver, and the Mountaineer, from Chicago to the Pacific coast. It has been announced. The cars will have bath rooms, valet service, lounge and smoking space, and a solarium, and vista-glass windows.

The sea is constantly productive of tales of adventure. A recently told story is that about Commander S. Robinson, O.B.E., of the Canadian Pacific, the Empress of France who turned his ship into the face of a hurricane and went 500 miles out of his course to take aid to injured seamen on a storm tossed Japanese freighter. The great liner waited beside the freighter, which had been badly battered by the huge waves and some members of whose crew had been injured, but found it impossible for boats to pass between the two ships to convey a doctor. After waiting for half a day the master of the Japanese ship reported that he could make port, and the Empress of France continued on her interrupted voyage.

RIPPLING RHYMES

By Walt Mason
Painful Luxury

It must be painful to a man to journey in a rich sedan, along the village street, and mark the butcher's gloomy stare—he owes that butcher for a hare, and other forms of meat. It must be painful to behold the grocer, who is waxing old, and needs all monies due; he owes that worthy grocer cash for prunes and beans and succotash, a sack of flour or two. I'd hate to drive my limousine in state around the village green if everywhere I met and crochets with imploring eyes, and utter a heaving weary sigh, to whom I was in debt. I couldn't much enjoy my car, or drive it. Here admirers are, if tailors looked askance, suggesting that they need the groats I owe for costly vests and coats, and divers pairs of pants. It is a luxury to slide along the blooming countryside, to push the gas and steer, if you are not afraid you'll meet some creditor, on weary feet, who's chased you for a year. It takes the brightness from the day to have some chap come up and say, his face all dark with woe, "I wonder why you don't produce the money for that large fat goose you bought six months ago?" It makes you bow your crested head to hear the baker talk of bread for which you haven't paid; you lose your pride in your fine bus when every merchandising cuss his ledgers has displayed. This sort of thing I would not choose, I'd rather walk in misty shoes, and know I'd paid my bills, than be in debt, and ride in pomp where all the jazy steeds romp along the sun kissed hills.

Progress Made In Development Of the Hudson Bay Route Shown In Report Recently Published

Up-to-date information on the progress made in the development of Canada's Hudson Bay route is contained in a report recently prepared by the Natural Resources Intelligence Service of the Department of the Interior in co-operation with the Department of Railways and Canals. The objective set on the extension of the Hudson Bay Railway during 1928 was 460, thus bringing the steel within 50 miles of Churchill. Actually the steel reached Mile 462 thus accomplishing all that was expected and leaving only 16 miles to be constructed during 1929 to reach the tidewater terminus.

The mobilization of men and materials and equipment necessary to accomplish the work planned for 1928 on the railway and at the port is dealt with in the report. At the peak of operations during the season it is stated that 2,000 men were employed on the railway. The preliminary operations on port development employed 430 men during the season and a feature of the operations was that the work was materially expedited by the use of airplanes which operated between Churchill and the end of steel.

The report points out that the visit to Churchill of Frederick Palmer, eminent British engineer, which resulted in the selection of that port as tidewater terminus, was made in August, 1927. In a little more than a year from the date of Palmer's report the railway had been advanced 106 miles from the point at which the Churchill extension leaves the original line to Nelson at Mile 356. In the operations of 1928 the equipment used on the Hudson Bay Railway work included three steam shovels, a track-laying machine and 12 locomotives.

The past summer was a very busy one at Churchill in the construction of temporary docks and the commencement of permanent construction. During the navigation season some 10,000 tons of material sent in by sea from Halifax and Sydney were unloaded at the new port and the dumper dredges, "Churchill No. 1" and "Churchill No. 2" built at Montreal especially for the work, appeared on the scene as well as the hopper barge "Chesterfield." A second hopper barge was also towed from Port Nelson to Churchill and added to the equipment. The arrival of the dredges clears the way for an early start on extensive development this year and large supplies of materials are now on hand for prosecuting the work.

Up to March 31, 1928, there had been expended on the work at Churchill, \$897,950 and during the present fiscal year to Nov. 30 there had been a further expenditure of \$2,561,000 making a total of \$3,458,950. The expenditure on the Hudson Bay Railway up to March 31, 1928, is given as \$20,780,248 and since that date up to Nov. 30, the report states, an additional \$2,606,000 had been expended, a total of \$23,386,248. The expenditures on the railway and port during the 1928 season alone exceeded five million dollars. The cost of the railway, exclusive of ocean terminals, when completed it is estimated will be in the neighborhood of \$28,500,000.

The development of the ocean terminals will account for an expenditure of many millions more and other work in the development of Canada's northern transportation route includes the establishment of modern aids to navigation in Hudson Bay and Strait. The aerial expedition established by the Department of Marine and Fisheries at three points on Hudson Strait in 1927 continued its reconnaissance until late in 1928 and much useful information bearing on navigation was secured. As a result strategic locations for aids to navigation are

Pool Legislation

Full Protection For the Grower Must Be Assured

Following a protest by C. E. Gregory, who attended a meeting of the private bills committee as legal representative of "a group of growers," Hon. T. C. Davis, attorney-general, announced in the Saskatchewan legislature, that it was the intention of the government not to declare law that part of the Wheat Pool incorporation bill that would limit the time for legal action to one year after the adoption of the report of the pool delegates on any one year.

Mr. Davis said that the amending clause would be included but would not be acted upon until such time as it had been referred to and approved by a meeting of the pool delegates. Other sections that bring about retroactive legislation will stand in the original amending measure. By a later clause in the amending bill and one considered by the private bills committee, the retroactive element would not in any event apply to actions for accounting and for damages that might be before the courts or pending.

Mr. Davis admitted the Pool should not be subjected to a series of vexatious legal actions. But he declared, too, that while as full protection as possible should be afforded the Pool, the grower was also entitled to just as full a measure of protection. The legislation asked for, he claimed, was "dangerous." Nowhere, he said, could there be found in law a limitation to the time an action for accounting could be brought against a trustee and the Pool in handling the farmers' wheat merely acted as trustee for the farmers. If the Pool handled the property properly there was nothing to fear, and no need to place a limitation on time an action could be started.

The Careless Ones Pay

Higher Car Insurance Rates Prompted by Number of Accidents
Motorists throughout the prairie provinces will learn with interest, perhaps with something of a feeling of dismay, of the 27 per cent. increase in motor car insurance rates in their province.

The increase does not apply to fire or theft, but has been prompted chiefly by the growing number of collisions or accidents of other sort, and is due to representations of the insurance agencies that they have either been losing money or else have been making inadequate profit. There is nothing for motorists who insure their cars—and the great majority of them do—to do but to pay the increase, but it is essentially a case of careful motorists being made to pay for the carelessness of some of their fellow drivers. The announcement of the Western Canadian Underwriters' Association should add zest to the campaign for safety in the streets and on the roads and highways. Many of the accidents in which motorists figure are wholly inexcusable.

Aunt Betty (reading nursery rhyme)—"The cow jumped over the moon." Do you believe that?"
Modern Child—"Certainly not. That attitude record was never officially authenticated by the A.A.U."

Phyllis—"Why are you steaming open that letter so carefully?"
Freda—"Oh, I've had a quarrel with Frank, and I want to see what he has to say before I return his letter unopened."

Step-In Combination
The well-bred woman demands dainty underwear that is practical at the same time. Style No. 784 will wear indefinitely made of good quality crepe de chine, batiste, voile, heavy georgette crepe, rayon silk or flat silk crepe. The two-piece camisole with straight outline across the top, perforated to be trimmed with lace banding, has attached drawers with opening at center-back. It is especially easy to make, and only requires 1½ yards of 40-inch material with 1½ yards of 36-inch lace banding for the 36-inch size. Pattern comes in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches bust measure. Price 25 cents in stamps or coin (coin preferred).

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Fashion Magazine, showing all the most attractive Paris styles, embroidery, etc.

Considered Desirable Forage

Mixture of Peas With Oats a Success If Properly Sown

(Experimental Farms Note)
Pea and oat mixtures are commonly grown and considered desirable forage in the older parts of Canada. In the west, however, they are grown very little, partly because less stock is raised and partly because early attempts to grow a mixture have proved failures. Various mixtures and methods of sowing have been tried out at Northern experimental station and this article embodies results derived from these tests during the last five years.

Three varieties of peas and two of oats have been used in mixtures and the most desirable combination we have found to be Victory oats and Mackay peas. Both are strong, tall growing, and mature at about the same time. This allows for harvesting at the best stage for forage, which is when the oats are turning color and the peas are well filled with peas.

Mixtures and methods of sowing used were: 25, 50 and 75 per cent. peas mixed with oats and sown together. Peas and oats were also sown in equal amounts separately, the peas being sown one week and two weeks before the oats. Where mixtures were sown the drill was set at four bushels of oats per acre. Mackay peas and Victory oats were also sown alone for purpose of comparison.

Peas sown one week and two weeks before the oats and the 75 per cent. mixture of peas yielded more cured hay than either' oats or peas alone. Where 75 per cent. of peas were sown with the oats the percentage of pea vine at harvest was about 40, where peas were sown one week earlier than the oats the percentage of pea vine was 60, and where two weeks earlier, 70 per cent. The other mixtures yielded less than peas or oats alone and contained a small percentage of pea vine at harvest time. Sowing peas one week before the oats is possibly the best method of insuring a crop of peas and oats of good quality. If the peas are sown two weeks previous to the oats, they get too strong a start and are likely to lodge before harvest, making cutting difficult; and where sown together the oats will overtake the peas and a small percentage of pea vine will be the result.

Where a pea and oat mixture is desired, we would recommend using Mackay peas and Victory oats. Sow the peas about one week before the oats and set the drill for each at two bushels of oats. Cut when the oats are commencing to turn in color, to get the best quality of feed.

Had to Wash

The raw recruit was 30 seconds late on the morning of his first dress parade, and later on had to report the orderly-room.
"I am exceedingly sorry, sir," he apologized, "but I woke rather late, and there were only 10 minutes for me to dress."

"Ten minutes?" roared the angry officer. "Why, I can dress comfortably in less than 10 minutes!"

The recruit shifted his weight from one leg to the other.

"Yes, sir," he said innocently. "But I had to wash, sir."

Needed Rain

Farmer—How's your rheumatism this morning, Lucindy?
His wife—it doesn't bother me at all this morning.

Farmer—That's too bad. We need rain terribly for the crops."

Channel Tunnel Scheme Between England and France Has Once More Been Revived

Planes Return From North

Machines Cover 8,000 Miles in Search for Minerals

After an epoch-making flight into the barren lands, where air trails were blazed across the bleak wastes of the sub-Arctic in an aerial search for minerals, two cabin aeroplanes of the Dominion Explorers, Ltd., were brought to Winnipeg from The Pas by Capt. B. W. Broatch and Capt. J. McKillan.

While in the north the 'planes were in charge of Capt. Charles Sutton, former Royal Air Force aviator and mail pilot on the Cairo-Bagdad route, and Captain Broatch, pioneer of the air trails of the frontiers of Canada. They made their base at Mistake Bay, about 150 miles south of Chesterfield Inlet.

The 'planes were taken into the north country by Captains Sutton and Broatch early in the summer, flying the machines in a long loop from New York to Hudson Bay. Two Moth 'planes also were used by the exploration party in the barren lands.

During the season the cabin machines covered more than 8,000 miles between them without mishap. Many of the flights over the barrens were beset with dangers, but the pilots dared the hazards of an unknown land, immeasurably aiding in the quest of rich minerals.

The main party of the expedition came south some weeks ago, but will return to the barrens in March.

Jap Living Standard Low

Large Per Cent of Workers Receive Less Than, Fifty Dollars Monthly

That the living standard of most Japanese is still far below that in western nations is emphasized in a report by the ministry of finance. These figures show that 93 per cent. of the wage earners of Japan receive less than \$50 a month. There are 12,000,000 registered families in Japan, and in only 6 per cent. of these is the total income between \$50 and \$200 a month. The percentage of those getting more than \$200 a month is 1.3.

The contrast to the American standard may be appreciated when it is realized that the absolute minimum for a family of four or five, according to western custom, is in the neighborhood of \$300 a month. Living expenses in Tokyo for the foreigner are acknowledged to be as high as any place in the world. The Japanese, however, must subsist largely on rice, fish and a few pickles. There can be very little expenditures for even such luxuries as heating.

Plenty of Weeds
When thinking of next spring's seed supply, the Farmer's Advocate says it is well to bear in mind that there are already millions of weed seeds slumbering beneath the snow—no need of sowing more.

"Jim—"You'll freeze stiff standing here waiting for your girl!"
Joe—"Well, I want to make myself solid with her."

Nothing angers a woman more than a man who refuses to lose his temper.

An informal poll of the British House of Commons by Sir William Bull is said to show that an overwhelming majority of the members favor the many-times-suggested English Channel tunnel.

An even more fascinating proposal than the 80-year-old project for the tunnel, also now under discussion in England, is a 21-mile channel bridge. From it travelers who have suffered the tortures of channel sea-sickness could laugh at the churning waters that caused them misery.

A channel bridge scheme was outlined 40 years ago. Competent engineers claim such a structure feasible.

But British military strategists, arguing for national security, have violently opposed the bridge project as well as the more practical tunnel through all the decades of discussion.

The question to be decided is whether the great war altered England's isolation as a tight little island. Those who favor the tunnel say Britain is directly open to attack from the air and to siege by submarines. If they can convince the military strategists of this, the tunnel project will at last enter the field of practical politics.

Political rather than engineering difficulties always have blocked the channel tunnel.

A channel tunnel, by cutting out the steamer, would save an hour and a half on the trip from London to Paris.

France never has opposed the project, for with traditional enemies just across long frontiers, an undersea tube which could easily be blocked or even destroyed in case of war, presents no terrors.

Commercial companies exist both in England and in France to carry out the tunnel scheme, the cost of which is estimated at \$150,000,000.

Proved Good Neighbors

Iowa Farmers Cleared Blockaded Roads to Let Doctor Through

Critically ill with influenza, Harvey Northey, residing on a farm outside of a small settlement in the state of Iowa, was unable to reach a doctor. Five miles away a physician stood ready to go to the stricken man's bedside, but was separated from him by snowbanks 12 feet high. This was the information conveyed by telephone to one of Northey's neighbors.

In short order 11 other neighbors gathered together with tractors, snowplows and hand shovels and dug an opening in the snow for the doctor to get through. These men, facing a 60-mile wind, cut through five miles of road and roused hundreds of tons of snow. The doctor was able to administer treatment that has placed Northey on the road to recovery.

Deeds such as this may not be preserved for posterity as are heroic deeds on the battlefield, bravery at sea, or triumphs of the sky. But they are in every sense of the word heroes of the first water.

Made a Difference

Lady—"What a noise those neighbors make. Listen to the children howling."

Maid—"But that noise comes from your own nursery."

Lady—"Really! The little darlings must be enjoying themselves."

Chris—"Marriage acts like a brake on a man."

Bilse—"Sure does! It broke me!"

There will never be a decrease in the price of mistakes even though they are made in larger numbers!

At least two-fifths of England's diet consists of bread.

"You will never get permission to kiss me, and if you use force you will have to stun me first. The chloroform is on the shelf in the bathroom, first door on the left."
—Kerikaturer, Oslo.

JOLLY TARS IN HORNPIPE ROLL

Only they are tar-esses, as it were, and these pretty maidens gave a massed hornpipe, as shown above, at Vancouver's first Sea Music Festival held January 23-26 at the Hotel Vancouver in that city under the auspices of the Canadian Pacific Railway. Miss Mary Isedale (centre) presented the dance and also arranged others for the festival.

VITAMINS

Everyone needs them to support growth on the body against germ-infection.

Scott's Emulsion abundantly rich in vitamins is of great importance in all rundown conditions of the body. Scott's Emulsion builds strength.

Scott & Borne, Toronto, Ont. 25-41

WORLD HAPPENINGS BRIEFLY TOLD

The freighter Port Curtis arrived recently at Halifax from Auckland with more than 5,000,000 pounds of New Zealand butter, a record cargo.

The Rockefeller foundation has donated \$85,000 to McGill university for medical research to be paid over four years.

Acting on the recommendation of the foreign minister, King Alexander of Yugoslavia has signed the Briand-Kellogg pact for renunciation of war.

Arthur F. Wallis, registrar of the surrogate court since 1911, and former editor-in-chief of the Toronto Mail and Empire, is dead at his home here. He was 79 years of age.

A treaty between the United States and Japan to aid in the prevention of smuggling of alcoholic beverages into the United States has been ratified by the senate.

It is understood the salary of Sir Basil Blackett, newly appointed chairman of the merger company controlling Imperial wireless and cable communication will be \$40,000 a year.

The menace of revolvers and threats of personal violence held no fear for Joseph Davis, clothing merchant of Ottawa, who successfully staved off an attempt by three would-be bandits to hold him up.

A reunion of an unusual kind was held in London when 34 Antarctic explorers, survivors in Britain of nine Antarctic expeditions and two relief expeditions, met to form a dinner club. Membership is to be limited to those who have participated in Antarctic explorations.

Leon Trotsky, whose opposition to the policies of the Soviet's leaders in Moscow caused his expulsion from the Communist party and his exile in Turkestan, was en route to Constantinople, it was revealed in authoritative advices received at London.

Minard's Liniment for Coughs and Colds.

Should Procure Oat Seed
Farmers of Alberta are being advised by the Provincial Department of Agriculture to make the necessary provision for securing the supply of oats for seed which they will require for their 1929 crop. The effects of frost in a number of districts are reflected in a reduction in the germinating quality of a great many of the oats threshed.

Discovers New Island
Commander R. E. Byrd in a flight over King Edward VII Land discovered a new island and 14 peaks according to a radio message from the Byrd South Pole expedition copyrighted by the New York Times and the St. Louis Post-Despatch.

Only the unforgotten endure the agony of corns. The knowing one apply Holloway's Corn Remover and get relief.

It is not doing the thing we like to do, but liking the thing we have to do that makes life blessed.

Nervous and Run Down The Least Noise Would Bother Her

Mrs. R. Burton, Ottawa, Ont., writes: "Three years ago I was so nervous and run down I could hardly bear to have the children make a noise it would bother me so."

"A friend advised me to take

MILBURN'S HEART NERVE PILLS

and after taking two boxes I began to feel stronger, looked better, and the color came back into my cheeks, and now I am feeling like again."

Price 50c, a box of 12 pills, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Safety Device For Miners

Copper Diggers in Mexico Wear Steel Head Protection

A United States bureau of mines engineer reports, following a recent visit to one of the big Mexican copper diggers, that the latter concern permitted no one, miner, manager or visitor, to go underground unless he wore a steel head protection. The company furnishes the helmets to the men at 50 cents each and replaces all damaged ones free of cost. On one occasion a bunch of ore weighing 87 pounds fell through the top lagging, a distance of four feet and struck a miner squarely on top of the head. The steel hat was badly dented, but the man was uninjured, save for a slightly sprained neck. The company has on exhibition at the mine head a collection of several hats, all badly dented, that represent each a miner's life saved.

Sale For Worthless Horses

Montana Packing Plant Will Require Seventy Head Daily

Surplus range ponies which 'now are more or less worthless, may find a market at the horse meat packing plant just opened in Grand Falls, Montana. Southern Alberta has hundreds of nondescript range horses roaming the prairies, eating up valuable grass and the Great Falls plant may be in a position soon to handle many of these animals for it will require 70 head daily. The output will be shipped to Continental Europe where horse meat is a staple commodity.

Mendicancy De Luxe

Young Englishman Simulating Pauper Collected Large Sum Daily

In the opinion of G. K. Chesterton, complete social equality in England will not be achieved until a costermonger may wear a monocle without exciting remark. It would be interesting to have his comment on the discovery by the police of a professional beggar with a valet. A young man, only 23, he was busily engaged in putting Mr. Ford's doctrine into practice and spending his easy earnings in ways which he thought to his own advantage when the authorities evinced an acute curiosity concerning the source and extent of his finances. A country house, with completely equipped billiard room and other of his luxuries. His income, as produced by simulating pauper, is amounted to as much as \$100 in a day. Subway travelers, observing his pathetic figure, have been deeply touched—for sums from 10 cents upward. The interruption of this enterprising mendicant's activities, just at the threshold of the prosperous holiday season, must have been especially bitter.

CORNS

Relief in 2 Minutes

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "PUTNAM'S" is so easy, so sure, so painless—thousands use this wonderful remedy and say it is the best. Don't suffer any longer. Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store.

Live Stock Prize Winners

Saskatchewan Breeders Won 160 At Fairs During Last Year

According to a compilation of the Live Stock Review of the Provincial Government Department of Agriculture, live stock breeders won 160 prizes in 1928 at the following fairs: The Royal Winter Fair at Toronto, the International at Chicago, and the annual fairs at Ottawa and Guelph. There were 5 grand championships, 3 trophies, 2 reserve grand championships, 10 senior and junior, 7 reserve senior and junior, 2 Canadian bred and reserve Canadian bred, 31 firsts, 27 seconds, 33 thirds and 34 others. At the Royal, 102 prizes were taken, 24 at the International, 26 at Ottawa, and 8 at Guelph.

New Brunswick Settlers

Five Hundred British Families to Be Placed in Province

One hundred British families were placed on farms in New Brunswick in 1928 under the assisted settlement plan which completes the quota for that year. The scheme is being continued until 500 families have been located in this province. The farms are provided by the New Brunswick government. Loans up to £300 are made by the British government and the settlement arrangements are under the supervision of the Dominion government. Repayments extend over 28 years with interest at 5 per cent. per annum.

LONG SLEEP MAKES BABY HAPPY AGAIN

"Our baby kept waking us several times a night, until we started giving him a little Castoria after his last nursing," says an Iowa mother. "He slept soundly from the first night and made him look and feel worlds better." Baby specialists endorse Fletcher's Castoria; and millions of mothers know how this purely vegetable, harmless preparation helps babies and children, with colic, constipation, colds, diarrhoea, etc. The Fletcher signature is always on the wrapper of genuine Castoria. Avoid imitations.

Vancover Port Improvements

The Vancouver Harbour Board is understood to be seeking federal permission for launching a construction program involving \$5,000,000 of port improvement. The proposed works include a deep sea pier, the first unit of a cold storage plant, a coastsweeper pier and extensive additions to the present grain storage capacity of the port.

FLU

Claims Many Victims in Canada and should be guarded against.

Minard's Liniment

Is a Great Preventative, bring one of the oldest remedies used. Minard's Liniment has relieved thousands of cases of Grippe, Bronchitis, Sore Throat, Asthma, and similar diseases. It is an Enemy to Germs. Thousands of bottles being used every day. For sale at all druggists and general dealers.

Minard's Liniment Co., Ltd., Vancouver, B. C.

Searching For Sunken Island

California Man Starts Fantastic Cruise Because of Dream

A "dream island," sunk in the Pacific ocean off the California coast is the destination of a fantastic cruise headed by B. M. Bramley, paving contractor, who has bought the steam yacht Peter from Donald R. MacMillan, explorer, for the expedition.

Bramley's Island lies under 20 feet of water, where it was first revealed to him in a dream while in Cleveland. So vivid was his dream and so inviting was the prospect of 20th century exploration and discovery in gems sailed for centuries by ships of every nation that Bramley set out in search of his island while in California.

A ship was chartered and he made soundings for days without success. He gave up the idea and was about to return when persistent prompts to find his "dream island" caused him to charter an aeroplane for further search. He found it, plainly visible from the cockpit, he said, 15 or 20 feet of water.

Now he means to build a breakwater about the place, pump sand from the bottom of the sea to make new land, and erect thereon a fishing and outing paradise.

How Best to Use Vicks VapoRub After the Flu

Late Winter Colds Are Doubly Dangerous This Year; Don't Let Them Get a Start

AVOID PNEUMONIA OR A SECOND ATTACK OF FLU

If you catch a fresh cold, don't keep it overnight. If possible, go home and go to bed. Take a laxative and a hot beverage, apply hot towels over throat and chest until the skin is thoroughly reddened. Rub vigorously with Vicks Spread on throat and cover with warm flannel.

Leave the bed-covering loose, so that the vapors, released by the body-heat, may be freely inhaled. At the same time, Vicks acts through the skin like a plaster.

Repeat this treatment every four hours, eat lightly, and stay in bed until the cold is broken. Complete rest helps the body throw off the cold more quickly.

Mothers especially appreciate Vicks for the children. As it is applied externally, it can be used freely, without any untoward delicate digestion, as so much "dosage" is so apt to do.

Skipping Motor Age

China Is Now Turning Her Attention to Aviation

"China, if the signs are read aright, is about to 'jump' the automobile age and pass direct from the bullock cart and railroad to the aeroplane and all that it embraces. This is not to say that motor cars manufactured by no motor car manufacturers may not find a lucrative field in the 18 provinces which comprise China proper, for the automobile is making inroads there; but it is almost certain that before the motor vehicle has become to the east what it has become to the west, aviation will have found acceptance as a common means of conveyance.

Miller's World Powders will eradicate the worm that kills but has no heavily on children and is believed to cause many fatalities. They are an acceptable medicine to children and can be fully relied upon to clear the food channels thoroughly of these destructive parasites and reduce the inflammation and pain and faces to healthfulness. They are an excellent remedy for these evils.

An Eastern Saying

He who knows not, and knows not that he knows not, is a fool—shun him;

He who knows not, and knows that he knows not, is ignorant—teach him;

He who knows, and knows not that he knows, he is asleep—awake him;

He who knows, and knows that he knows, he is wise—follow him.

The longest telephone call in the British empire is now from London to Vancouver, a distance of 7,000 miles. The charge is about \$15 a minute.

SUNDAY SCHOOL LESSON

FEBRUARY 10

REPENTANCE AND FAITH

Golden text: Repent ye, and believe in the gospel. Mark 1:15.

Lesson: Isaiah 1:10-20; Ezekiel 18:20-23, 27-32; Mark 2:1-12; Luke 3:1-14; 15:11-24; Acts 2:38-39; Hebrews 11:1-10.

Devotional reading: Psalm 27:1-5.

Explanations and Comments

Jesus is Sovereign and Messiah. Acts 2:14-36—Peter is speaking to Jews, and his first object is to prove that Jesus fulfilled Old Testament prophecies and expectations in regard to the Messiah, hence he tells them (verses 15-21) that the events of Pentecost which had so amazed them are the fulfilment of Joel's prophecy (Joel 2:28-32), that at the coming of the Messiah God's Spirit would be poured forth, and old and young, men and women, bond and free, would see visions and speak divine truths.

Then Peter takes up his great theme that Jesus is the Christ, and gives three proofs. First, there are the miracles which his hearers had themselves witnessed. Second, there is the resurrection, of which they all are witnesses; God had raised Jesus from the dead to higher life and wider power. Third, there is the pouring forth of the Holy Spirit at Pentecost, which they have seen and heard: Jesus still lives and cares for his followers, for it is He who has sent the Spirit. Furthermore, the resurrection and exaltation fulfill prophecy of David, as given in Psalm 110:1.

The Lord said unto my Lord, sit thou on my right hand,

Thou shalt make thine enemies the footstool of thy feet.

Two different Hebrew words for Lord are used in the first line, and the meaning is, Jehovah said unto the Messiah. David could not have been speaking of himself, for David did not ascend into the heavens. "Sit thou on my right hand" means, Be partaker of the divine glory and dominion. "Thou shalt make thine enemies the footstool of thy feet" is an expression denoting complete victory, which originated, no doubt, from the ancient custom of conquerors putting their feet on their enemies' necks.

Then comes the climax of Peter's sermon: "Let all the household of Israel therefore know assuredly that God hath made him both Lord and Christ, this Jesus whom ye crucified."

Alberta's Farm Wealth

The Calgary Herald says that in 1906 the Province of Alberta had a farm wealth which was estimated at \$50,000,000, while in 1927 it had jumped to \$38,161,458. And while it produced about 6,000,000 bushels of wheat in the former year, in the latter it yielded 162,000,000 bushels. We wonder what 1947 will show!

Chemists are now trying to make artificial cotton from wood fibre.

FOR SALE—Fully equipped farm of seven quarter sections in the Leduc district. \$5,000.00 will handle; balance half crop payments. Owner retiring. Apply to S. W. Ketten, Leduc, Sask.

"Are there any questions?" "Yes, sir. 'How do you calculate the horse-power in a donkey engine?'"

YOU'LL FIND A

hundred vital, saving uses for Para-Sani Heavy Waxed Paper in your home.

Comes in handy, sanitary, knife-edged package. For less exacting uses: "Centre Pull" Waxed Tissue (flat sheets). At grocers, druggists, stationers.

So Many Home Uses!

Keep foods fresh longer by covering them with Para-Sani.

Use Para-Sani to keep baby's bottles fresh.

Keep the freshness in sandwiches prepared for the party with a covering of Para-Sani.

CHAPTER XIII.—Continued.

"Isn't it beautiful?" He indicated with a sweep of his arm the lake, the wooded hills and the glittering glaciers lifting their party high to the sparkling firmament. He turned to find his companion standing with downcast eyes.

"Don't you like it?" he asked, a trifle resentfully.

Janet raised her head slowly. The limpid depths of the big brown eyes were soft and languorous in the half-light; the full red lips were dewy and tremulous; the peaceful light of the moon shone upon her radiant upturned face, giving it an ethereal glow.

"It is wonderful," she breathed.

Involuntarily he moved closer. What was this inner urge? Love—feeling—emotion, or, it might be, passion?

Laughter and voices came from the trail above. Douglas with several of the visiting party emerged into the white light of the moon. Douglas called his sister's name and Janet and Donald moved up the hill to join them.

CHAPTER XIV

A week before Dominion Day men began applying for leave of absence until the exodus depleted the crew to such an extent that it was deemed advisable to shut down for a week. Donald turned to Gillis as he saw the whole crew of "redshirts" pile tumultuously on the train.

"How often do the men quit like this?" he asked rather irritably.

"Every holiday," replied Gillis. Donald pondered a moment.

"That means that we may lose a week for Labour Day."

"Very likely."

"Jack, do you think we could keep them here if we held some sort of celebration at the lake?"

"I believe we could," responded Gillis warmly.

"We'll do it then," declared Donald. "We've so many orders ahead that this lay-off may force us to run a night crew."

"Did you spend all your dough, Blackie?" asked Gillis when the "redshirts" arrived back from town.

"Mc and Hoop-la spent about two hundred bucks, but we had three hundred dollars' worth of fun. We can't get enough money to buy a hummingbird a pair of legions, but we sure had a helluva good time, so we ain't worryin'."

"All right, Blackie," said Gillis gently, "I'll advance it to you."

"Thanks, Jack, you're a good pal," commended Blackie in a relieved tone.

Donald and Gillis walked down the hill to inspect the logs in the boom, and as they walked Gillis indulged in some pointed observations. "You know, Donnie, that these loggers are game guys to come back after spendin' all their money and say: 'We had a good time, so we ain't worryin'.' The man ain't human that won't worry after spendin' in a few days the money it's taken him six months to earn swingin' an axe ar' draggin' a saw. Still, they hide their remorse under a grin and tell of what a good time they've had. So many people think that loggers spend all their money for booze. Tain't no. That gang of mine give away about half their money to bums around town. I have seen Blackie give away twenty bucks at a time."

"As they passed the high-rigger's little cabin, Gillis poked his head through the door. Blackie was absorbed in the task of sewing a patch on a pair of worn boots. A mournful wind blew querulously around the cabin."

"Say, Blackie, do you know what that wind is saying?"

Blackie cracked a negative.

"Here's what it says," said Gillis, as he poked his lips. "O-o-o-o-o-h! Where has your summer wages come? Oh, where has your summer—"

Gillis dodged back as a boot came whizzing past his head.

Midsummer brought an epidemic of labor disturbances throughout the Province. A radical organization seized on a time when work was plentiful and labor scarce to spread their insidious propaganda through the camps. Railroad construction in the interior had been seriously interfered with, and in many cases there had been violence and bloodshed.

Two agitators arrived at the Summit Mill, and the next day several of the men—including Hand and Blackie—did not appear when the whistle blew. Gillis found them in Blackie's cabin in a half-drunken condition. That afternoon Renwick ordered the two strangers off the premises and discharged Hand.

Hoop-la begged successfully for lenience toward his erring pal. "You know how booze affects Blackie, Jack," he pleaded.

Donald became aware of a changed bearing on the part of many of the men. Sullenness had fallen upon them; discontent manifested itself, as well as insubordination. That afternoon spies driven in the logs wreaked havoc with the saws and forced a partial shut-down.

A committee of four men waited on Renwick and presented an ultimatum. They demanded a heavy increase in wages, or they would call for an immediate cessation of work on the part of the men they represented. Renwick promptly refused, and in 15 minutes every man in the mill except the clerical staff, the mechanics and the engineer, walked out. In the woods only Gillis' "redshirts" remained at work.

The strikers moved up the track and made camp on a point of land on the lake shore. That night the door of the commissary was pried from its hinges and a quantity of food stolen, and the night watchman put out a fire of incendiary origin.

Renwick, while returning from the power house, was shot at twice from ambush. He wired his resignation to Robert Rennie, and in terrified haste packed his belongings and left

"S'pose you bought them new boots?" inquired Gillis.

Blackie forced a laugh. "Goin' to get them next time, Jack," he continued moving closer to his big boss. "Say, Jack, you know that I send twenty dollars to my mother back east every month. I—"

"All right, Blackie," said Gillis gently, "I'll advance it to you."

"Thanks, Jack, you're a good pal," commended Blackie in a relieved tone.

Donald and Gillis walked down the hill to inspect the logs in the boom, and as they walked Gillis indulged in some pointed observations. "You know, Donnie, that these loggers are game guys to come back after spendin' all their money and say: 'We had a good time, so we ain't worryin'.' The man ain't human that won't worry after spendin' in a few days the money it's taken him six months to earn swingin' an axe ar' draggin' a saw. That gang of mine give away about half their money to bums around town. I have seen Blackie give away twenty bucks at a time."

"As they passed the high-rigger's little cabin, Gillis poked his head through the door. Blackie was absorbed in the task of sewing a patch on a pair of worn boots. A mournful wind blew querulously around the cabin."

"Say, Blackie, do you know what that wind is saying?"

Blackie cracked a negative.

"Here's what it says," said Gillis, as he poked his lips. "O-o-o-o-o-h! Where has your summer wages come? Oh, where has your summer—"

Gillis dodged back as a boot came whizzing past his head.

Midsummer brought an epidemic of labor disturbances throughout the Province. A radical organization seized on a time when work was plentiful and labor scarce to spread their insidious propaganda through the camps. Railroad construction in the interior had been seriously interfered with, and in many cases there had been violence and bloodshed.

Two agitators arrived at the Summit Mill, and the next day several of the men—including Hand and Blackie—did not appear when the whistle blew. Gillis found them in Blackie's cabin in a half-drunken condition. That afternoon Renwick ordered the two strangers off the premises and discharged Hand.

Hoop-la begged successfully for lenience toward his erring pal. "You know how booze affects Blackie, Jack," he pleaded.

Donald became aware of a changed bearing on the part of many of the men. Sullenness had fallen upon them; discontent manifested itself, as well as insubordination. That afternoon spies driven in the logs wreaked havoc with the saws and forced a partial shut-down.

A committee of four men waited on Renwick and presented an ultimatum. They demanded a heavy increase in wages, or they would call for an immediate cessation of work on the part of the men they represented. Renwick promptly refused, and in 15 minutes every man in the mill except the clerical staff, the mechanics and the engineer, walked out. In the woods only Gillis' "redshirts" remained at work.

The strikers moved up the track and made camp on a point of land on the lake shore. That night the door of the commissary was pried from its hinges and a quantity of food stolen, and the night watchman put out a fire of incendiary origin.

Renwick, while returning from the power house, was shot at twice from ambush. He wired his resignation to Robert Rennie, and in terrified haste packed his belongings and left

the next train. An hour later the agent brought Donald a telegram:

"Donald McLean,
"Summit Mill."

"You are promoted to position vacated by Renwick. Refuse strikers' demands. Ship at Squamish Oriental order white plane. Utmost importance lumber loaded within week. Use every means in power to keep plant operating."

"Robert Rennie."

He passed the message to Gillis. The big man turned and grasped Donald's hand in congratulation.

"We'll get that order out on time or bust," declared Gillis grinsly.

Donald distributed firearms among his loyal men, and one-half the crew patrolled the plant while the others slept.

Donald had been up the greater part of the night, and at Gillis' earnest request he went to his cabin near midnight. As the door closed behind him, Connie, with her rifle resting in the hollow of her arm, rose silently from behind a tree in the darkness of the hillside and nodded noiselessly on moss-covered feet from stump to stump. Unseen she reached the corner of Donald's cabin, where she sank to the ground with the soft, slow grace of a nestling bird.

The Cheekamus Mill, robbed of man-power, was forced to cease operations. At the Summit Mill work went on with such speed as in the situation Donald was able to induce in the men, who were on edge. To him it seemed that they were working on top of a powder mine that might go off at any moment. He discovered in himself a facility to induce men and to raise them to a fever pitch of enthusiasm—not that the B. C. logger is a hard man to lift to the fighting point. His right against great odds had gained the sympathy of the loyal—sympathy and respect that money could not buy. Gillis' gang, with the exception of "Blackie," remained fervently faithful.

Toiling in the hot sun, nearly blinded by ever singing lustily, this gallant crew worked their 12 hours without a murmur of complaint. Donald lived on the job, ate on the job, and all day long he drove his men even as he drove himself. His rest consisted of such fitful stretches of sleep as he could steal between his rounds of the night guards.

The first move of the strikers was not of open violence. The haul-back on two of the donkeys broke without apparent reason: One of the big saws had been tampered with; Wilkinson reported two fires of incendiary origin, and also that an attempt to dynamite the power-house had been frustrated.

On the third morning Hand, at the head of a mob of 50 men, made a swift descent on the lumbering operations. It might have been successful if Donald had not expected something of this kind and set efficient watch.

The invaders came down the track in a solid body, armed with cut-dog handles, pick axes and clubs, and thirsting for battle. At Donald's quick shout of warning his men dropped their tools and came on the run to form in a compact body behind him.

"Don't use your guns unless you have to," he warned, as he noticed several of them flash their revolvers.

Donald climbed quickly to the top of a large stump. In his left hand he held a stick of dynamite with fuse attached; in his right he held a match close to the dangling fuse.

"Men!" he cried in a determined tone, "if you move forward one step I will throw this."

(To Be Continued.)

Young Doctor—"Just think! Six of my patients recovered this week!"

Old Doctor—"Serve you right. You spend too much time at the club!"

Donald lived on the job, ate on the job, and all day long he drove his men even as he drove himself. His rest consisted of such fitful stretches of sleep as he could steal between his rounds of the night guards.

The first move of the strikers was not of open violence. The haul-back on two of the donkeys broke without apparent reason: One of the big saws had been tampered with; Wilkinson reported two fires of incendiary origin, and also that an attempt to dynamite the power-house had been frustrated.

On the third morning Hand, at the head of a mob of 50 men, made a swift descent on the lumbering operations. It might have been successful if Donald had not expected something of this kind and set efficient watch.

The invaders came down the track in a solid body, armed with cut-dog handles, pick axes and clubs, and thirsting for battle. At Donald's quick shout of warning his men dropped their tools and came on the run to form in a compact body behind him.

"Don't use your guns unless you have to," he warned, as he noticed several of them flash their revolvers.

Donald climbed quickly to the top of a large stump. In his left hand he held a stick of dynamite with fuse attached; in his right he held a match close to the dangling fuse.

"Men!" he cried in a determined tone, "if you move forward one step I will throw this."

(To Be Continued.)

Young Doctor—"Just think! Six of my patients recovered this week!"

Old Doctor—"Serve you right. You spend too much time at the club!"

Dairying in Holland

Industry Governs Economic Life, Says Canadian Trade Commissioner

The dairying industry is the backbone of Dutch economic life, writes J. C. Macgillivray, Canadian trade commissioner in Rotterdam, in the Commercial Intelligence Journal. There are 160,000 hands employed in milk cattle breeding alone. In addition to these figures there are the employees of over 900 butter and cheese factories and the persons engaged in the distribution of the yearly production of 3,500,000,000 kilos of milk and its derivations. Holland is the largest exporter of cheese in the world. The Dutch dairy factories may be classified as co-operative and non-co-operative. Of the former there are 617, divided as follows: Butter factories, 243; butter and cheese, 149, cheese only, 56; milk products only, 17; butter, cheese and milk products, 149. For the non-co-operative factories these figures are, respectively, 17, 45, 1, 51 and 187, making a total of 810.

Recipes for This Week

(By Betty Barclay)

Beef and Pumpkin Left-Over
2 cups left-over beef roast,
copped fine.

1 cup cooked pumpkin.
2 tablespoons sugar.
1 teaspoon salt.

4 small crackers, rolled fine.
1 egg.
1/2 cup milk.

1/2 teaspoon cloves.
2 tablespoons butter.

Mix all together and heat. Pour into greased baking dish, dot with butter and brown.

Chicken a la King
1/2 green pepper, shredded.
1 pound mushrooms.
3 tablespoons butter.

6 tablespoons flour.
2 cups evaporated milk.
2 cups chicken broth.

Salt.
Pepper.
3 cups cold chicken, diced.
1/2 pintanto, shredded.

Cook pepper and mushrooms, if they are raw, slowly in butter 8 minutes. Cover while cooking. Remove mushrooms and pepper from fat, add flour, milk, broth and seasonings. Cook 5 minutes over a low flame, stirring to keep smooth. Add chicken, mushrooms, pimiento and pepper and reheat in double boiler to prevent curdling. Yield: 8 servings.

A New Explanation
Policeman—"How do you account for having all these things in your pockets?"

Suspected Person—"Well, you see, creifer, we ain't got no sideboard at 'ome."

The chief products of the Cape Verde Islands are coffee, hides, and millet.

400,000 Women Report Benefit by actual record

"Have you received benefit from taking Lydia E. Pinkham's Vegetable Compound?"

A questionnaire enclosed with every bottle of medicine has brought, to date, over 400,000 replies. The overwhelming majority—in fact, ninety-eight out of a hundred—says, "Yes." If this dependable medicine has helped so many women, isn't it reasonable to suppose that it will help you too? Get a bottle from your druggist today.

Amateur Discovers Comet

Find Was Confirmed by Cape Town Union Observatory

An amateur astronomer living at Rosebank, a small community near Cape Town, South Africa, distinguished himself recently by the discovery of a new comet. His "find" was confirmed immediately by officials of the Union Observatory in Cape Town. The comet could not be seen with the naked eye. It travelled slowly, and had no tail. The astronomers of the observatory plan to observe it for some time.

When He giveth quietness, who then can make trouble. Job 34:29.

Let Thy mercy's wings be spread Over me; keep me close to Thee. In the peace Thy love doth shed Let me dwell eternally. Be my All; in all I do Let me only seek Thy will Where the heart to Thee is true, All is peaceful, calm and still. —A. H. Francke.

All the peace and favor of the world cannot calm a troubled heart; but when the peace in which Christ gives, all the trouble and disquiet of the world cannot disturb it. All outward distress to such a mind is but as the rattling of the hall upon the tiles to him that sits within the house at a sumptuous banquet. —Archbishop Leighton.

Canada's Silk Industry
Latest Report Gives Gross Value as About Ten Million

In the past 11 years the silk industry of Canada has increased 50 1/2 per cent. in the number of establishments, 251 per cent. in number of employees, 496 per cent. in salaries and wages, and 303 per cent. in gross value of products. Since 1924 the capital investment has increased from \$5,744,502 to \$22,327,818 in 1927. The annual gross value of the Canadian silk industry is nearly \$10,000,000, according to the latest available figures.

Announcers of the British Broadcasting Company take singing lessons regularly to help them polish their voices for speaking into the microphone.

Husband (sternly)—"I'll show you who's running this house."

Wife—"You can't. It's her day out."

Little Helps For This Week

When He giveth quietness, who then can make trouble. Job 34:29.

Let Thy mercy's wings be spread Over me; keep me close to Thee. In the peace Thy love doth shed Let me dwell eternally. Be my All; in all I do Let me only seek Thy will Where the heart to Thee is true, All is peaceful, calm and still. —A. H. Francke.

All the peace and favor of the world cannot calm a troubled heart; but when the peace in which Christ gives, all the trouble and disquiet of the world cannot disturb it. All outward distress to such a mind is but as the rattling of the hall upon the tiles to him that sits within the house at a sumptuous banquet. —Archbishop Leighton.

Agricultural machinery and petroleum products shipments were unusually heavy in 1928. Approximately 3,000 reaper-threshers were in use in Saskatchewan and, in most cases, were reported satisfactory.

Indigestion

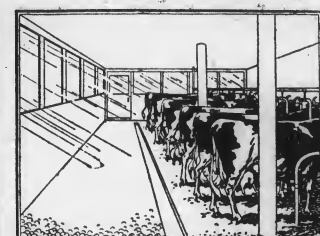

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise. The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, greenhouses, and all buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hotels, beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness weighs about 120 to 125 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized breeding, given a new stimulus to poultry rearing, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Local News

Blairmore defeated Hillcrest by a score of 7-0 in a league game on Bellevue ice last night.

Mrs. McCallum, of New Dayton, is visiting at the home of her daughter, Mrs. L. Lindoe.

Bob Wilson was injured in the McGillivray mine on Tuesday by a piece of coal striking him in the back.

Miss Connie Hoper returned home from business college in Calgary suffering from an attack of influenza.

Mr. F. VanDuzee has been transferred to the Canadian Bank of Commerce at Hanna. Mr. Saxby of Red Deer, has been transferred to Pincher Creek branch.—Echo.

At the 100 F. and Rebekah whist drive and dance held last Saturday evening the prize winners were Mrs. R. Vincent, Mrs. J. Emerson, S. Penney and J. Emerson.

Mrs. O. E. S. Whiteside entertained last Saturday afternoon from 3 to 6 in honor of Mrs. H. V. Hummel, when quite a number of ladies from Blairmore and Coleman called.

Even a bill announcing a hard times dance for Hillcrest, that by the way was printed in Lethbridge, looked the part. We have no idea of how cheap the job was, but it should have been cheaper.—Blairmore Enterprise.

In the Crow League schedule a game is yet to be played between Coleman and Hillcrest. According to present arrangements this will be played next Friday night at Bellevue, as the Hillcrest club has not satisfactory ice.

To-morrow evening, Friday, will be held another of the whist drive and dances under the auspices of the Elks in the K. of P. hall. These evenings have proved very enjoyable during the season, and it is anticipated there will be a good gathering to-morrow evening. Admission is 50c each person, to members and their friends.

Mr. John Kerr, well known resident of Passburg, will give a very interesting illustrated lecture in the United church on Tuesday next dealing with "A Visit to the Old Land." The views are very fine and are from photographs taken during his visit in the United Kingdom. His address will have particular interest to all, especially those familiar with the places he visited.

Water pipes continue to freeze, and shortly after Electrician Peet and his crew thaw them out they freeze up again. All through the Pass towns west to Cranbrook there has been similar trouble to contend with, the very cold weather having caused a great deal more difficulty than in an average year. When householders have running water these days, they feel so fortunate that they offer up a nightly prayer that it will continue.

BABY CHICKS—Canada's Bred-to-Lay, 100 per cent alive guaranteed. Breeding certificate sent with chicks from tested, trappened Leghorns Barred Rocks, Reds, Anconas, Minorcas, Wyandottes, Orpingtons. And Then—What?

Eminent statisticians have frequently announced that a very large percentage of denizens on this orb have anticipated their income by purchasing commodities which must be paid for at some future date, yet energetic salesmen are daily attempting to persuade these mortgaged individuals to add other lien notes to their supply.

No doubt credit can be distended to a remarkable degree but some day something is going to happen. That something may not descend upon us until each household has its family airplane, a car for each member including the maid, a radio in each room of their two homes—one must have a summer home at the beach—a bathroom for each bedroom and other essentials for everyday comfort, but when that something does descend it will be interesting to watch the bailiffs collecting the unpaid merchandise and seeking to dispose of it for cash to a bankrupt race.

PERSONAL STATIONERY

The Journal office will print 100 good quality envelopes for \$1.00, or 100 letter size paper for \$1.00, printing limited to three lines consisting of name and address. Cash at the time of ordering. Leave an order for your personal correspondence.
